

SRIDHAR MEDISHETTI

Full Stack Developer

Hyderabad, India | medishettisridharvarma79@gmail.com | 9110301163 | [LinkedIn](#)

Profile

Full Stack Developer with hands-on experience in Java, Python, JavaScript, React, and Node.js. Skilled in building responsive web applications, modular backend services, and database-driven solutions using MongoDB and SQLite. Strong understanding of object-oriented programming, REST APIs, frontend-backend integration, and software development lifecycle. Passionate about developing scalable applications and contributing to collaborative engineering teams.

Education

Lovely Professional University, Jalandhar

Computer Science and Engineering, Jun 2018 to May 2022

Internships

Object oriented Programming with Java, Ebox technologies, Jalandhar

Jun 2020 to Aug 2020

- Engineered robust backend modules using **Java**, focusing on **Object-Oriented Design (OOD)** principles to improve code modularity and reusability.
- Developed and optimized data structures to enhance application performance and processing speed.
- Collaborated on debugging and unit testing to ensure high-quality, error-free code delivery.

Technical Skills

Frontend Technologies :

HTML | CSS | JavaScript | React

Backend Technologies

Python | Java | Node.js

Databases

SQLite | MongoDB

Projects

Data Cryptography

Jan 2022 to Apr 2022

Developed a file encryption and decryption application using Python that secures digital assets through byte-level data manipulation techniques. The application was designed to protect multimedia and text files by converting them into unreadable formats until decrypted with a valid security key.

Key Features:

- Implemented encryption and decryption functionality for text(.txt) , audio (.wav), video (.mp4), and image (.jpg) files.
- Utilized byte-level transformation techniques to ensure secure and reliable data processing.
- Designed a graphical user interface (GUI) for user-friendly file encryption and key-based decryption operations.
- Maintained file integrity to ensure accurate recovery of original data after decryption.
- Improved understanding of cryptography concepts, file handling, and secure data processing using Python.

Library Management System

Jul 2020 to Sept 2020

Built a responsive Library Management System frontend using HTML, CSS, and JavaScript with dashboard and authentication interfaces.

Summary of Features:

- User-friendly login and registration pages.
- A dashboard to view total books, issued books, and fine details.

Professional Training and Certifications

Java Programming, EBOX TECHNOLOGIES

May 2020 to Aug 2020

HTML , CSS , JavaScript, NxtWave

Jan 2026 to Feb 2026

Programming Foundations with Python, NxtWave

Feb 2026 to Apr 2026

Introduction to Data Bases, NxtWave

Jan 2026 to Feb 2026

Languages

Telugu, English, Hindi

Extracurricular Activities

Blood Donation Camps, Redcross, City

May 2021 to May 2021

- Conducted many awareness camps and educated students about importance of blood donations
