

SRIDHAR MEDISHETTI

Full Stack Developer

Hyderabad, India • 9110301163
medishettisridharvarma79@gmail.com • [LinkedIn](#)

Profile

Full Stack Developer with hands-on experience in Java, Python, JavaScript, React, and Node.js. Skilled in building responsive web applications, modular backend services, and database-driven solutions using MongoDB and SQLite. Strong understanding of object-oriented programming, REST APIs, frontend-backend integration, and software development lifecycle. Passionate about developing scalable applications and contributing to collaborative engineering teams.

Education

Lovely Professional University, Jalandhar, Jun 2018 to May 2022
Computer Science and Engineering

Internships

Object oriented Programming with Java, Ebox technologies, Jalandhar, Jun 2020 to Aug 2020

- Engineered robust backend modules using **Java**, focusing on **Object-Oriented Design (OOD)** principles to improve code modularity and reusability.
- Developed and optimized data structures to enhance application performance and processing speed.
- Collaborated on debugging and unit testing to ensure high-quality, error-free code delivery.

Technical Skills

Frontend: HTML, CSS, JavaScript, React.js, Bootstrap
Backend: Node.js, Express.js, Java, Python
Databases: MongoDB, MySQL
Tools & Technologies: Git, GitHub, REST APIs, VS Code

Projects

1 .Cloud Kitchen Delivery Management | MERN, Mar 2026 to May 2026

- Developed a scalable full-stack cloud kitchen and food delivery web application using the MERN Stack with responsive UI and secure JWT authentication.
- Integrated Razorpay payment gateway to enable seamless online transactions and improve checkout experience.
- Built RESTful APIs and implemented CRUD operations for cart management, food inventory, order processing, and delivery tracking using MongoDB.
- Designed an admin dashboard with role-based authorization to manage food items, customer orders, and delivery workflow efficiently.
- Utilized GitHub for version control and collaborative project management.
- Optimized MongoDB queries reducing load time by ~40%

2. Data Cryptography | Python, Jan 2022 to Apr 2022

- Developed a secure file encryption and decryption application using Python to protect multimedia and text files through byte-level data transformation techniques.
- Implemented encryption support for text, image, audio, and video files while maintaining file integrity during secure data recovery.
- Designed a user-friendly GUI for secure key-based authentication, encryption, and decryption operations.
- Improved understanding of cryptography concepts, file handling, and secure data processing techniques.

3. Library Management System | HTML, CSS, JavaScript, Node.js, Jul 2020 to Sept 2020

- Developed a responsive CRUD-based Library Management System with authentication, REST API integration, and dashboard functionality.
- Implemented book issue, return, and fine management workflows to streamline library operations efficiently.
- Designed intuitive login and registration modules with user-friendly navigation and responsive design.
- Managed records for 200+ books with issue/return/fine workflow.

Professional Training and Certifications

Java Programming, EBOX TECHNOLOGIES, May 2020 to Aug 2020

HTML , CSS , JavaScript, NxtWave, Jan 2026 to Feb 2026

Programming Foundations with Python, NxtWave, Feb 2026 to Apr 2026

Introduction to Data Bases, NxtWave, Jan 2026 to Feb 2026

Languages

Telugu, English, Hindi

Extracurricular Activities

Blood Donation Camps, Redcross, Nalgonda, May 2022 to May 2024

- Conducted many awareness camps and educated students in colleges and schools about importance of blood donations.
